PRODUCT NAME

Executrac HP Console
with Sheet Stacking

PRODUCT NUMBER

#6144 – 120V 60HZ
#6142 – 220V 50HZ

AVAILABILITY

IMMEDIATE

GENERAL DESCRIPTION AND MAJOR FEATURES

The Executrac model is the largest and fastest of the Diazit line of planprinters. Prints are exposed on a 6" (15cm) high precision glass printer cylinder and processed in the corrosion-resistant developer section. Prints are transported through the corrosion-resistant developer by a ceramic-coated roller. Print delivery and stacking is to the front. The ammonia supply is internal and may be heated or agitated for extended production runs. The Executrac model has instant on/off operation with no warm-up necessary. The print and original are separated manually and the printer and developer sections are equipped with a forward/reverse switch. The exclusive Diazit Total Reproduction Ammonia Control (TRAC) system removes ammonia odors from the prints and neutralizes them without outside venting. The Executrac catalog #6144 comes equipped with a Roll Box with Paper Cutter, a 500 Sheet Storage Compartment, and Front Delivery Print Stacking Tray as standard.

OPTIONS & ACCESSORIES

There is an optional Rear Delivery Print Stacking Tray available, P/N 7029, and an optional Tracing Catcher, P/N 5567 (Two are Required).

SERVICE CONSIDERATIONS

1 Year machine warranty plus 3 year developer case warranty
